**Thermo Fisher Scientific Expands its Single-Use Mixing Product Line**

*Offering Now Includes Innovative Docking Station with Three Detachable Tank Sizes,  
Plus 50 L and 2000 L Options for the Standard Single-Use Mixer*

LOGAN, Utah (June 24, 2009) – Thermo Fisher Scientific Inc., the world leader in serving science, today announced the launch of a Docking Station Mixing System for bioprocess production. The system encompasses a mobile mixing station for use with 200 L, 500 L and 1000 L detachable, mobile tanks designed to hold the Thermo Scientific HyClone Single-Use Mixer (S.U.M.) disposable bioprocess containers.

The HyClone S.U.M. and disposables technologies are widely used in the biopharmaceutical industry, and the new Thermo Scientific HyClone Docking Station System further enhances flexibility and productivity because the mixing station can be moved easily from one mixing tank to another. The tanks can also be provided with feet or casters to increase mobility.

In addition, the S.U.M. is now available in two additional standard sizes: 50 L and 2000 L S.U.M. systems. These new sizes expand the total range of functionality offered by the S.U.M. technology. They feature a breadth of disposable options, both standard and made-to-order, including disposables for powder-to-liquid, liquid-to-liquid and open-top liner mixing. The S.U.M. system tanks themselves are available in non-heated and water-jacketed versions.

For more information about these products, please contact your Thermo Scientific HyClone sales representative or visit us at: [www.thermo.com/hyclone](http://www.thermo.com/hyclone)

**About Thermo Fisher Scientific**

Thermo Fisher Scientific Inc. (NYSE: TMO) is the world leader in serving science, enabling our customers to make the world healthier, cleaner and safer. With 2008 revenues of \$10.5 billion, we have approximately 34,000 employees and serve over 350,000 customers within pharmaceutical and biotech companies, hospitals and clinical diagnostic labs, universities, research institutions and government agencies, as well as environmental and industrial process control settings. Serving customers through two premier brands, Thermo Scientific and Fisher Scientific, we help solve analytical challenges from routine testing to complex research and discovery. The Thermo Scientific brand represents a complete range of high-end analytical instruments as well as laboratory equipment, software, services, consumables and reagents to enable integrated laboratory workflow solutions. Fisher Scientific provides a complete portfolio of laboratory

equipment, chemicals, supplies and services used in healthcare, scientific research, safety and education. Together, we offer the most convenient purchasing options to customers and continuously advance our technologies to accelerate the pace of scientific discovery, enhance value for customers and fuel growth for shareholders and employees alike.
